Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 2617.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 23, 2006 has been entered.

Specification

3. The disclosure is objected to because of the following informalities: the continuing data should be included at the beginning of the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 2617

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Endo, US Patent No. 6,107,933.

Regarding claim 9, Endo discloses an emergency communication system terminal unit provided on a vehicle for transmitting information originated by a gyro sensor and a GPS receiver, both of which are included in the communication system terminal unit, comprising: data output means for outputting information respectively originated by the gyro sensor and the GPS receiver to a navigation system that includes display means and means for indicating a present position of the vehicle on the display means (col. 2, lines 42-59); and a control unit for controlling the entire emergency communication system terminal unit including the data output means (col. 4, lines 14-18), whereby the navigation system can indicate the present position of the vehicle without adding another gyro sensor and another GPS receiver to the navigation system (col. 2, lines 42-59; col. 4, lines 14-18).

Regarding claim 10, Endo discloses a communication system terminal unit, wherein the control unit instructs the data output means to output the information if a request signal is generated by a timer unit provided with the control unit or the navigation system (col. 2, lines 42-59; col. 4, lines 14-18).

Regarding claim 11, Endo discloses, wherein the data output means outputs speed pulse data or reverse data originated by the vehicle to the navigation system (col. 4, lines 11-18).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julio R. Perez whose telephone number is (571) 272-7846. The examiner can normally be reached on 10:30 - 6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph H. Feild can be reached on (571) 272- 4090. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
